High Performance

The pumps offer exceptional performance, providing high flow and proper pressure to ensure equal covering of your cropping areas, including pivot irrigation systems.

Energetic Efficiency

Focusing on sustainability, our pumps are designed to operate efficiently, optimizing energy consumption and reducing operational costs.

Back Pull-Out Project

The Back Pull-Out system allows the pump to be disassembled without having to remove the piping carcass, making maintenance easier and parts replacement processes faster.

3.500
m³/h

Operation Data

Flow: 3500 m³/h
Pressure: 250 mca
